UHF TAG-IN-ROLL

Tag-in-Roll solution for automatic linen manufacturing machines.

FT401 in roll

Product info

- Roll (cloth coil) dimensions: 36.5 mt long

- 500 tags included

- Compatible with most linen manufacturing machines on the market

- Featuring LaundryChips™ FT40I-ST ([see datasheet](#))
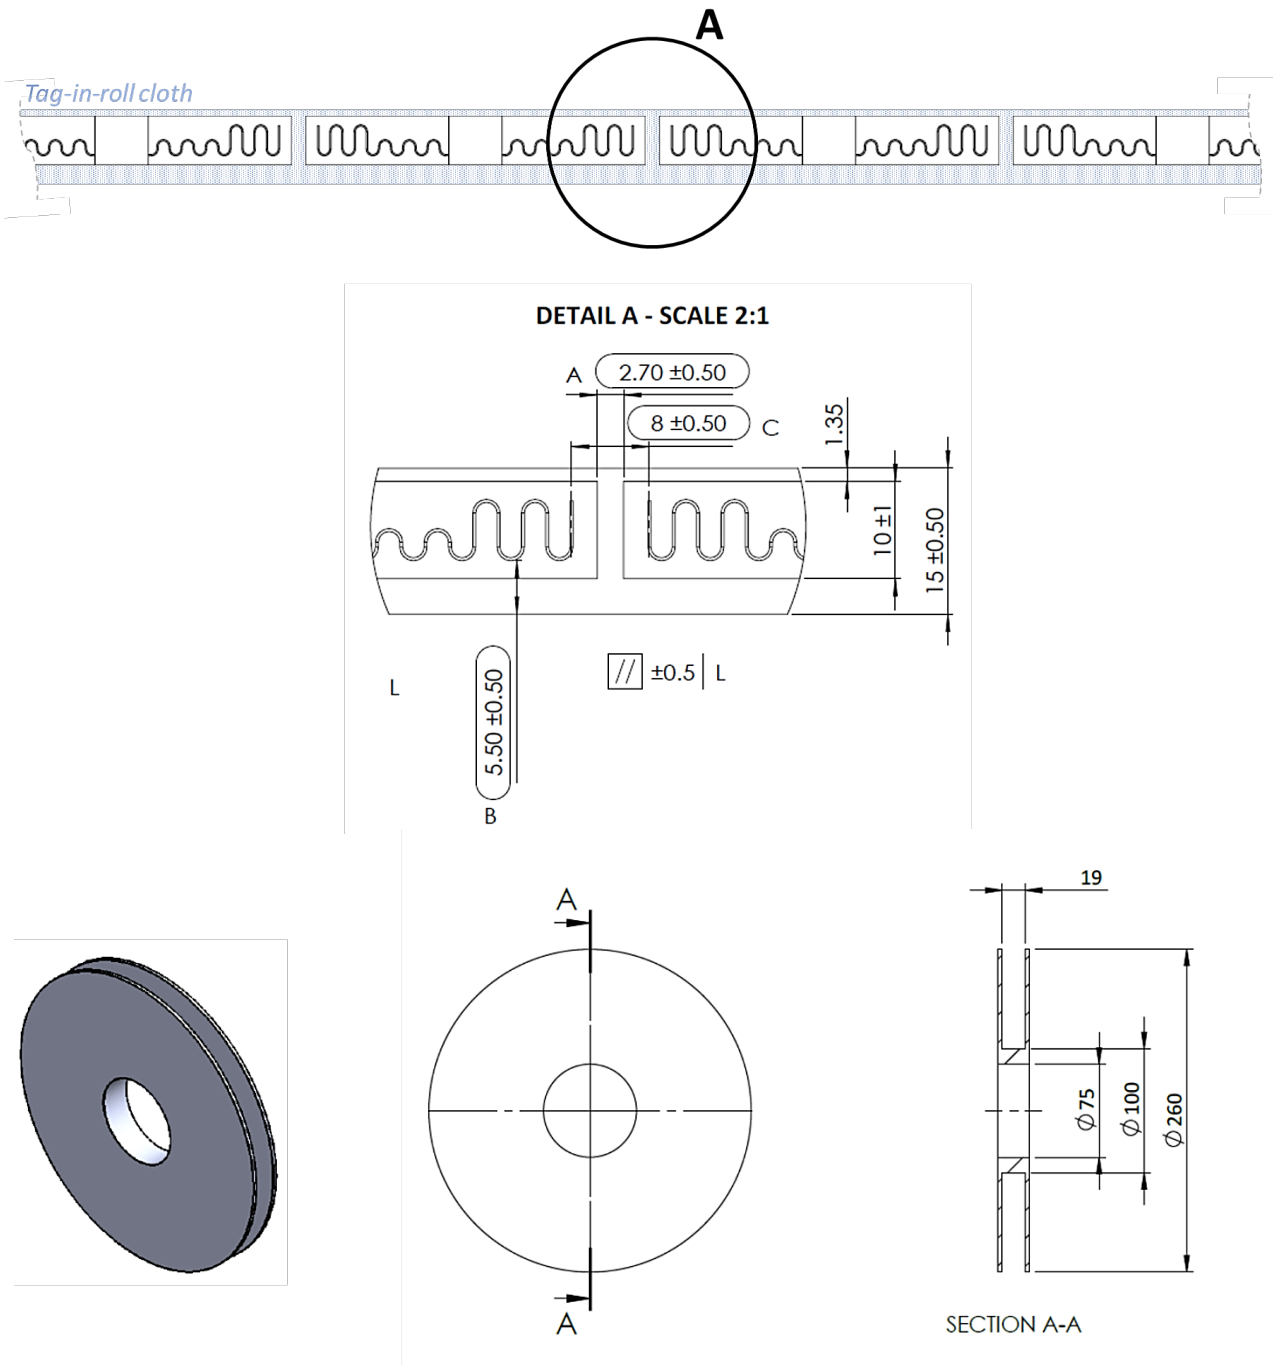

Product Description

The Tag-In-Roll configuration allows automatic machines to deal with RFID tags in the same way they deal with care labels, making the tag insertion process completely automated.

This tag-in-roll solution fits with most linen manufacturing machines on the market, but please contact us to confirm compatibility with yours.
